

In the Claims

1. (Currently Amended) A computer implemented method comprising:
receiving, via a ~~server computing device, from a having at least one~~ first information handling system of a user, an excerpt of information associated with the user,
~~wherein a first client computer comprises the first information handling system;~~
in response to receiving the excerpt, automatically translating, via the ~~server computing device~~, the excerpt into an XML format to be compatible, without further translation, for operation with at least one second information handling system of the user;
saving, via the ~~server computing device~~, the translated excerpt in a first personal folder associated with ~~[[a]] the~~ user of the first information handling system, the translated excerpt including a user-specified item of music, a website, a search query, and a search result; ~~[[and]]~~
synchronizing, via the ~~server computing device~~, the translated excerpt with the second information handling system ~~by communicating with a third information handling system associated with a server, wherein~~ a version of the translated excerpt is saved in a second personal folder associated with the user of the second information handling system and a third personal folder associated with the user of the server, wherein a second client computer comprises the second information handling system; and
associating, via the server, a name, a source, and a comment with the translated excerpt.
2. (Previously Presented) The method of claim 1, wherein the excerpt has a non-XML format, and wherein automatically translating comprises:
in response to receiving the excerpt, automatically translating the excerpt from the non-XML format into the XML format to be compatible for operation with the second information handling system.
3. (Previously Presented) The method of claim 1, wherein the excerpt has an alternate XML format, and wherein automatically translating comprises:

in response to receiving the excerpt, automatically translating the excerpt from the alternate XML format into a generic XML format to be compatible for operation with the second information handling system.

4. (Original) The method of claim 1, and comprising:
saving the XML-formatted excerpt in a personal folder of the user.
5. (Original) The method of claim 1, wherein the XML-formatted excerpt is a user-specified website.
6. (Original) The method of claim 1, wherein the XML-formatted excerpt is a user-specified search query.
7. (Original) The method of claim 1, wherein the XML-formatted information is a user-specified search result.
8. (Canceled)
9. (Currently Amended) A computer system comprising:
a server in communication with a first client including computing device having at least one first information handling system of a user for:
receiving an excerpt of information associated with the user;
in response to receiving the excerpt, automatically translating the excerpt into an XML format to be compatible, without further translation, for operation with a second client including at least one second information handling system of the user;
saving the translated excerpt in a first personal folder associated with [[a]]the user of the first information handling system, the translated excerpt including a user-specified item of music, a website, a search query, and a search result; [[and]]
synchronizing the translated excerpt with the second information handling system by ~~communicating with a third information handling system associated with a server,~~
wherein a version of the translated excerpt is saved in a second personal folder

associated with the user of the second information handling system and a third personal folder associated with the user of the server; and associating a name, a source, and a comment with the translated excerpt.

10. (Previously Presented) The system of claim 9, wherein the excerpt has a non-XML format, and wherein the first information handling system is for:
in response to receiving the excerpt, automatically translating the excerpt from the non-XML format into the XML format to be compatible for operation with the second information handling system.
11. (Previously Presented) The system of claim 9, wherein the excerpt has an alternate XML format, and wherein the first information handling system is for:
in response to receiving the excerpt, automatically translating the excerpt from the alternate XML format into a generic XML format to be compatible for operation with the second information handling system.
12. (Original) The system of claim 9, and wherein the first information handling system is for:
saving the XML-formatted excerpt in a personal folder of the user.
13. (Original) The system of claim 9, wherein the XML-formatted excerpt is a user-specified website.
14. (Original) The system of claim 9, wherein the XML-formatted excerpt is a user-specified search query.
15. (Original) The system of claim 9, wherein the XML-formatted information is a user-specified search result.
16. (Canceled)

17. (Currently Amended) A machine readable medium having stored thereon a set of instructions, which when executed, perform a method comprising ~~A computer program product stored on a tangible computer-readable medium, comprising:~~

~~at least one computer program processable by at least one first information handling system, comprising a computing device, of a user for causing the first information handling system to:~~

~~receive receiving an excerpt of information associated with the user from a first client computer including a first information handling system;~~

~~in response to receipt of the excerpt, automatically translate translating the excerpt into an XML format to be compatible, without further translation, for operation with a second client computer including at least one second information handling system of the user;~~

~~save saving the translated excerpt in a first personal folder associated with [[a]] the user of the first information handling system, the translated excerpt including a user-specified item of music, a website, a search query, and a search result; and~~

~~synchronize synchronizing the translated excerpt with the second information handling system by communicating with a third information handling system associated with a server, wherein a version of the translated excerpt is saved in a second personal folder associated with the user of the second information handling system and a third personal folder associated with the user of the server; and associating a name, a source, and a comment with the translated excerpt; and apparatus from which the computer program is accessible by the first information handling system.~~

18. (Currently Amended) The machine readable medium ~~The computer program product of claim 17, wherein the excerpt has a non-XML format, further comprising and wherein the computer program is processable by the first information handling system for causing the first information handling system to:~~

~~in response to receipt of the excerpt, automatically translate translating the excerpt from the non-XML format into the XML format to be compatible for operation with the second information handling system.~~

19. (Currently Amended) The machine readable medium ~~The computer product~~ of claim 17, wherein the excerpt has an alternate XML format, further comprising ~~and wherein the computer program is processable by the first information handling system for causing the first information handling system to:~~
in response to receipt of the excerpt, automatically ~~translate~~ translating the excerpt from the alternate XML format into a generic XML format to be compatible for operation with the second information handling system.
20. (Currently Amended) The machine readable medium ~~The computer program product~~ claim of 17, further comprising ~~wherein the computer program is processable by the first information handling system for causing the first information handling system to:~~
~~save~~ saving the XML-formatted excerpt in a personal folder of the user.
21. (Currently Amended) The machine readable medium ~~The computer program product~~ of claim 17, wherein the XML-formatted excerpt is a user-specified website.
22. (Currently Amended) The machine readable medium ~~The computer program product~~ of claim 17, wherein the XML-formatted excerpt is a user-specified search query.
23. (Currently Amended) The machine readable medium ~~The computer program product~~ of claim 17, wherein the XML-formatted information is a user-specified search result.
24. (Canceled)
